# Chemex Washroom Services

The Total Solution

Washroom Services

By now you are already familiar with the first-class level of service delivered to you by Chemex. We now want to manage an important but often overlooked part of your business - the washroom.

**Your staff and customers require and deserve clean and hygienic washroom facilities. Make sure that you don't disappoint them - we can help you to achieve better washroom standards.**

With the rising concern surrounding MRSA, *E.coli* and other contagious diseases, it is essential that you prevent your washrooms from becoming a breeding ground for bacteria. Accordingly, demands in the UK for washroom hygiene and sanitation have increased dramatically and the quality of a business is often judged by the standard of its washroom. Our specialist service is not only designed to improve both the cleanliness and hygiene of the washroom, but also enhance the overall image of the business.

The Environmental Protection Act (1990) places a duty of care upon your organisation to ensure that waste produced on your premises is properly managed right up until its point of final disposal.

Regulation 21 of the Approved Code of Practice, in the Workplace (Health, Safety and Welfare) Regulations 1992, states that: **"in the case of water closets used by women, suitable means should be provided for the disposal of sanitary dressings."**

The law stipulates that you must stop waste escaping from your control. You must store it safely and securely and you must prevent it from causing pollution and harming anyone.

**To help you meet with these regulations we offer a waste carrier service licensed with the Environment Agency in addition to a discreet and professional service for the disposal of sanitary and nappy waste.**

Like many Chemex products and systems, the Washroom Service is intended to offer you the peace of mind that comes with the knowledge that systems are in place to ensure that the standards of hygiene and cleanliness in their washrooms reflect well on their business. You will have the further assurance that compliance with the relevant legislation is also taken care of.

You can choose the services you need and require to create a bespoke package to meet their individual requirements.

## Odour Control

Chemex's unique service eliminates entrenched bad odours, unattractive discoloration and harmful germs and bacteria by removing at source the build-up of the mineral and organic matter that cause these problems.

## Sanitary Hygiene Service

Our safe and discreet hygiene service will make your female customers, visitors and staff feel more comfortable using your facilities.

Unique and modern unit design ensure it is easy for our operatives to clean on each service and reduce risk of cross infection

Pedal operated unit as standard ensures 'no touch' operation for users

The innovative reversible cover allows the unit to be located on either side within the cubicle

Flexible collection of sanitary waste to suit your needs

- Weekly, fortnightly or monthly.

Chemex also provide you with soap dispensers and air fresheners for your washrooms.

## Nappy Waste Service

This safe, discreet and hygienic service is an ideal way of disposing of soiled nappies and offers a safeguard from cross infection and unpleasant odours on your premises.

The interlocking lid ensures the contents remain sealed inside

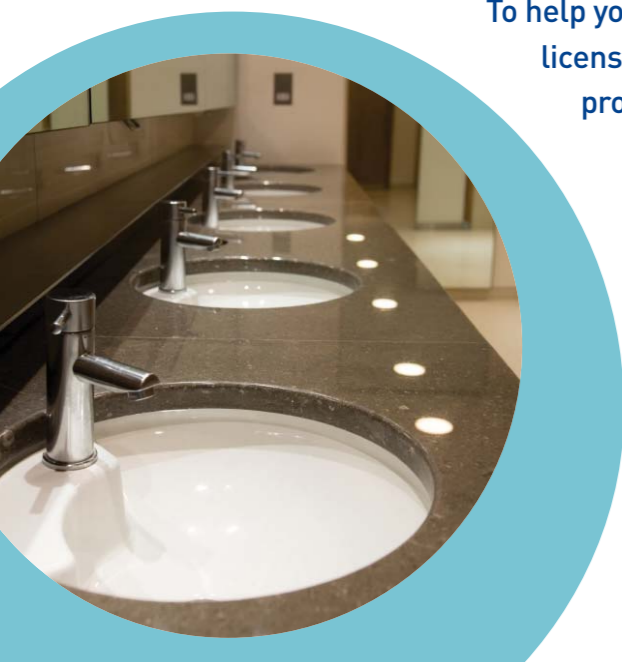

Flexible collection of nappy waste to suit your needs

- Weekly, fortnightly or monthly.

**Sanitary Bin** Volume: 23L Dimensions: h 550 x w 160 x d 540 mm

**Nappy Bin** Volume: 65L Dimensions: h 770 x w 410 x d 410 mm

Both are foot pedal operated

**The Washroom Service is contracted on a minimum two year contract and can include the following components:**

- Installation of sanitary disposal units
- Installation of nappy disposal units
- Waste transfer visits on an agreed schedule
- Installation of air freshener units
- Regular service visits to ensure optimum operation and fragrance
- Installation of disposable paper dispensers
- Toilet paper and hand towels stock levels recorded and recommendations made for replacement
- Replacement of batteries during the contract period (e.g. for air fresheners)
- Provision of hand soap during the contract period
- Delivery costs of all requisites
- Removal of dispensers at the end of the contract period
